II. Discussion

On November 9, 2022, the NRC requested comments on a regulatory basis to support a rulemaking that would amend its regulations for nonemergency event notifications, evaluate the current requirements and guidance for immediate notification of nonemergency events for operating nuclear power reactors and assess whether the requirements present an unnecessary reporting burden.

The public comment period was originally scheduled to close on January 9, 2023. The NRC has decided to extend the public comment period on this document until January 31, 2023, to allow more time for members of the public to submit their comments.

The NRC may post materials related to this document, including public comments, on the Federal rulemaking website at <https://www.regulations.gov> under Docket ID NRC-2020-0036.
